COLLECTION  
**FOCUS**

**DICHROIC EFFECTS**  
Angular color variations,  
in full surface or by patterns

**SEMI-TRANSPARENT BLACK**  
Seamless integration of HMI

# 01 FOCUS

Focus expresses an idea of **preciousness and attention to details**. A combination of **cutting-edges finishes enhanced by maximalist patterns**.

This collection presents a variation of possibilities in **dichroic and semi-transparent black coatings**. Both are **semi-transparent** allowing for **seamless integration of lighting elements, smart surfaces and displays**.

**We are partnering with the company E-ink to offer a switchable technology through low-energy solution**. This solution allows to change the colour atmosphere of the environment on-demand.
